St. Marien Children's Hospital is dedicated to responding to the needs of children and their caregivers. We also have a diverse, trained team of experienced specialists and competent consultants in the areas of Otorhinolaryngology, aesthetic surgery, oral surgery, implantology, and pediatric dentistry. Our Radiology Department provides a full range of imaging services for new-borns, infants, children, teens, and young adults, including X-Ray, MCU (micturating cystourethrogram) and scintigraphy (kidney scan). Our hospital is also a well-known training center for high-end sonography and doppler sonography.
